Your Care, Our Care

## Keter Battery Program

— 2016 +

# 2 things inside the autos, aim at safety and durability

One is tyre, which Keter is running for many years.

The other one is battery, which Keter will start.

**KETER**  
Your Cars, Our Care

A young man with brown hair, wearing a blue work shirt, is pointing directly at the camera with a serious expression. In the background, another person is visible, and a white vehicle is partially seen.

In 2016, Keter will provide  
more values besides tyres--

## New Battery Program!

Keter battery, better cares.

**KETER**  
Your Cars, Our Care

Keter battery, better cares.

# SAFETY

Unique Material Selection

*Unique Densimeter for Charge State*

*Dust-proof Diaphragm Burst Disk*

*Ultra-fine Glass Fiber Composite Separator*

*Maintenance-free Plate*

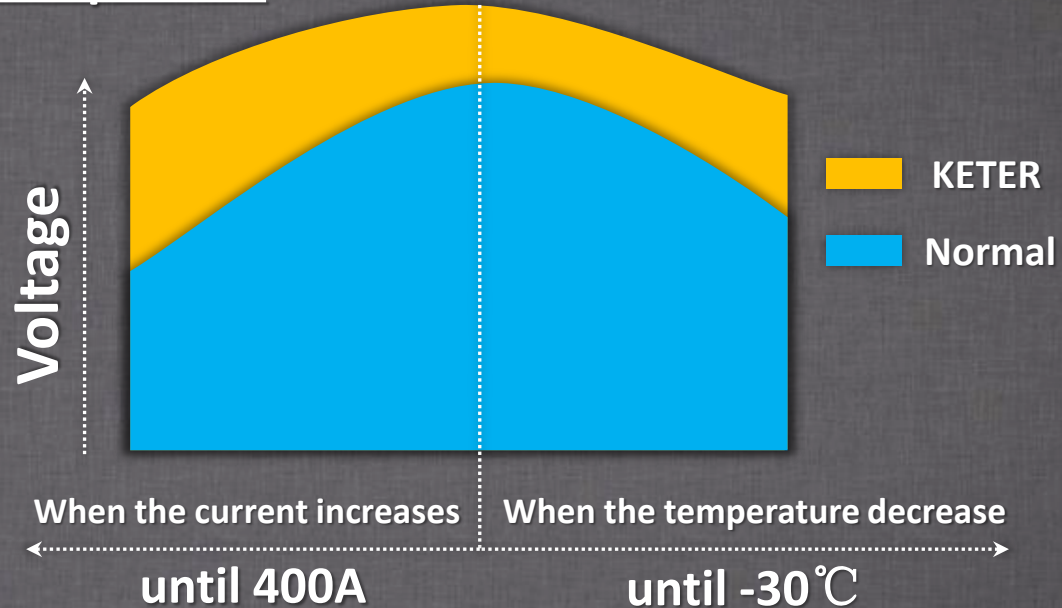

**KETER**  
Your Cars, Our Care

# DURABILITY

## Better in **voltage** by Composite Separator

Ultra-fine glass fiber composite separator, with light weight, small resistance, high acidity absorption and strong ion migration ability in the sulfuric acid solution, improves its battery voltage and starting current to the maximum, thus keeping the battery capacity in a good state all long.

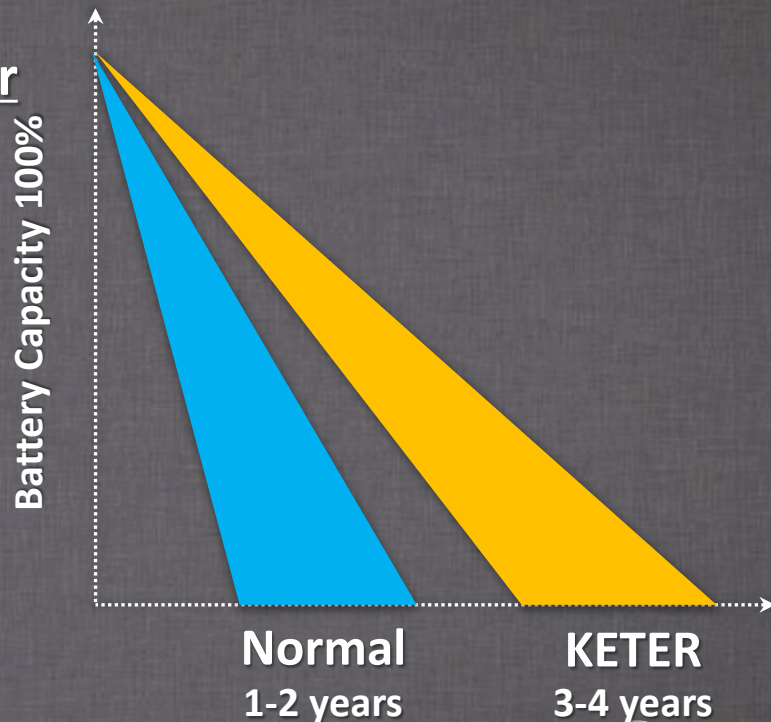

**KETER**  
Your Cars, Our Care

# DURABILITY

## Longer **battery life** by Composite Separator

Ultra-fine glass fiber composite separator, with the fiber diameter of 2-3um, is arranged disorderly in a network structure. The strong adsorption and breakover capabilities of the battery electrolyte can effectively condensate active substances and prevent them from dropping off, thus extending the battery life.

# DURABILITY

## Better in **Circle-Index** by the **High-Purity Pb(99.99%)-Ca** accumulate plate

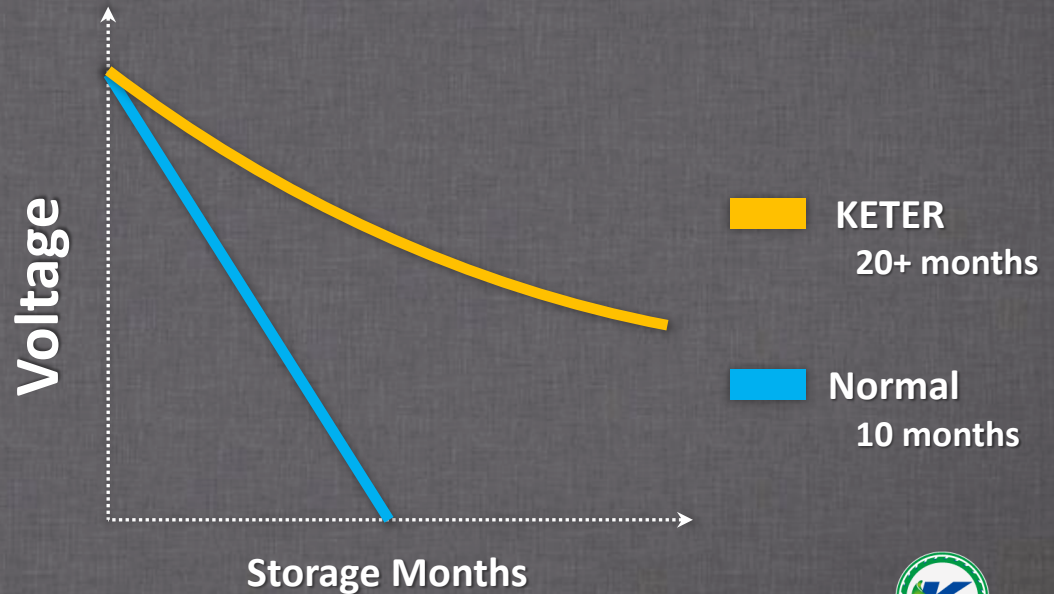

The accumulate plate made of high-purity Pb-Ca alloy has extraordinary oxidation and corrosion resistance capabilities. The adverse effect brought about by hydrogen evolution of general Sb alloy plate is avoided; the water loss of the accumulator slowed down, and the cycle index improved.

# DURABILITY

## Longer Storage-Period by the High-Purity Pb(99.99%)-Ca accumulate plate

The Pb-Sb-Ca alloy grid offers more excellent characteristics of oxidation resistance, corrosion resistance and less water loss than the general Sb alloy grid, which can minimize the self-discharge and maintain its good starting performance even after long-term storage.
