## ComfortMax AS H202

**Economic Summer**

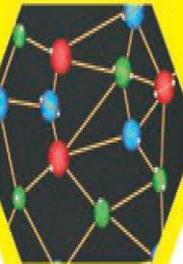

**ComfortMax AS H202** is designed for economic cars. The variable pitch and special tread block design provide super silence and excellent grip. The silica compound delivers reduced rolling resistance and fuel efficiency. Optimized outline provides comfortable journey.

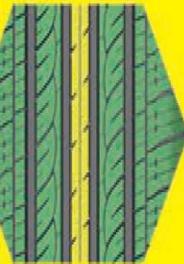

### Features & Benefits

Variable pitch and noise reducing shoulder deliver silent journey.

Special tread outline and section design improve handling stability and comfort.

All season design.

Balanced performance: Silence, Fuel Efficiency, Security, Comfort.

Silica compound provides excellent fuel efficiency.

# ComfortMax S801

## Summer HP

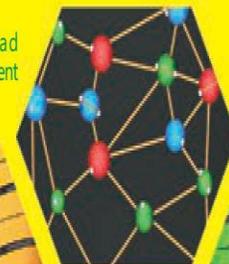

**ComfortMax S801** is designed especially for successful people. The advanced asymmetrical tread design brings super silence, excellent grip in wet and dry conditions, handling, and uncommon driving experiences. The silica compound delivers reduced rolling resistance for better fuel efficiency. Sizes from 13" to 17" meet your different demand.

## Features & Benefits

Asymmetrical tread design provides excellent grip and handling.

Strong block tread design improves mileage, stability, and security.

Balanced performance: Stability, Silence, Security, Mileage.

Silica compound delivers reduced rolling resistance for better fuel efficiency.

# S2000

## Summer UHP

**S2000** seeks exercise limit and extreme experience. The excellent high speed ability, handling in both dry and wet conditions, security and green design, make it to be preferred choice for luxury cars. Her stable performance is worthy of your trust.

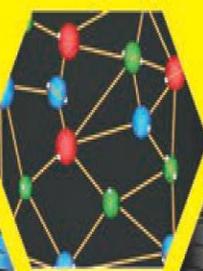

## Features & Benefits

Special asymmetrical design provides excellent grip and handling in both dry and wet conditions.

The updated SSBR and silica compound provide excellent wet grip, much reduced rolling resistance, and terrific handling in high speed.

The dramatic 2 central big grooves with special compound enhances efficient water evacuation to deal with all conditions.

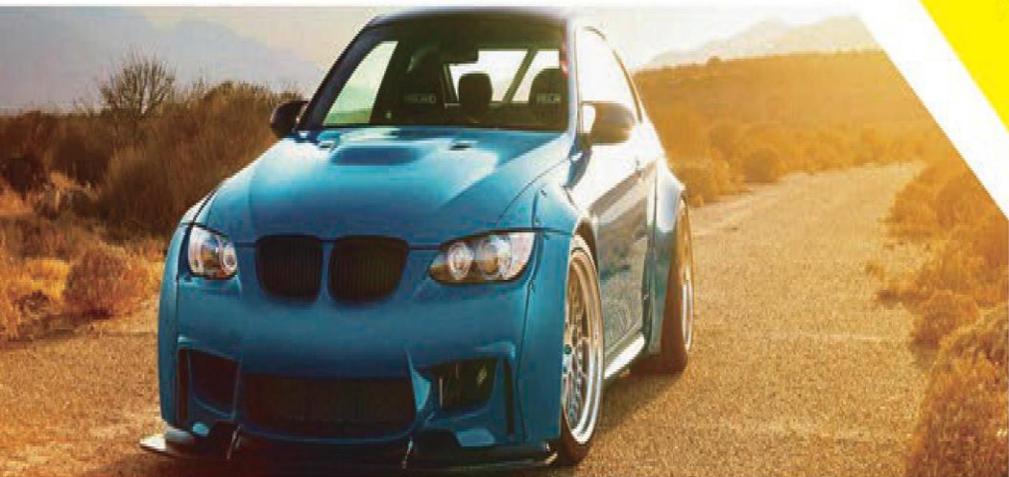

Sipes on outside shoulder enhance turning handling and low down noise in high speed.

# K737

**K737** Multi pitch pattern design combined with the silencer bloc, reduce noise effectively and improve driving quality, specially designed for private car owner with excellent safety and comfort.

## Features & Benefits

- Multi pitch pattern design combined with optimized pitch arrangement, reduce noise effectively and improve driving quality.
- Three central rib to ensure stability in straight driving, asymmetric pattern design brings excellent handling.
- Light weight of tire design, the application of new materials, super high strength steel wire and single wound bead wire. Improve the comfort and reduce the rolling resistance.
- The design of the silencer bloc can separate the loud waves enclosed in the pattern groove into small sound waves, effectively reduce the noise, and make it more quiet and comfortable.
- Silica compound of tread formula enables the tire to have better wetland braking performance and lower rolling resistance, which is more safe and energy saving.

# K3000

**K3000** Developed for the intermediate car, it's a sporty and comfortable high-performance tire with strong grip and handling to offer a precise driving experience, lower noise and rolling resistance, provide a comfortable life with car

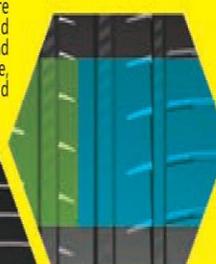

## Features & Benefits

The design of the silencer bloc can separate the loud waves enclosed in the pattern groove into small sound waves, effectively reduce the noise, and make it more quiet and comfortable.

Silica compound of tread formula enables the tire to have better wetland braking performance and lower rolling resistance, which is more safe and energy saving.

Asymmetrical pattern, lateral stiffener design, effectively inhibits the tyre deformation from vehicles turning and braking, excellent dry handling and braking performance.

Increasing the tire grounding area, optimizing the section profile and tire structure, provide more powerful grip.

Multi pitch pattern design combined with optimized pitch arrangement, reduce noise effectively and improve driving quality.

## PracticalMax H/P RS26

SUV HIP

**PracticalMax H/P RS26** is designed for luxury SUV, bringing you excellent handling, super stability and comfort, providing sporty passion and driving quality.

### Features & Benefits

Semi-closed tread grooves outside the tread, provides silence.

The wide grooves with special compound, enhances efficient water evacuation to deal with all conditions.

Tapered grooves enhance blocks stability, steady shoulder improves grips.

Asymmetrical design brings excellent grips, breaking, and better handling.

## Run Flat

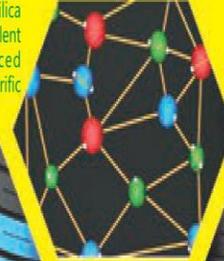

**S2000** seeks exercise limit and extreme experience. The excellent high speed ability, handling in both dry and wet conditions, security and green design, make it to be preferred choice for luxury cars. Her stable performance is worthy of your trust.

## Features & Benefits

Special asymmetrical design provides excellent grip and handling in both dry and wet conditions.

The updated SSB and silica compound provide excellent wet grip, much reduced rolling resistance, and terrific handling in high speed.

The dramatic 2 central big grooves with special compound enhances efficient water evacuation to deal with all conditions.

Revolutionary tread design, rising strength from inside to outside, can deal with both smooth mountain road and downpour highway, at leisure.

Sipes on outside shoulder enhance turning handling and low down noise in high speed.

# HF330

## Run Flat

**HF330** as a veritable ultra-high performance tire, has the excellent handling, Optimization on tread and structure improves the comfort, with the technology of RunFlat to ensure driving safety and environmental.

## Features & Benefits

Multi pitch pattern design combined with the silencer bloc, reduce noise effectively and improve driving quality.

Optimize the structure, increasing the contact patch, improves driving stability and handling

Silica compound provides excellent traction on dry/wet road condition, reducing rolling resistance and more energy conservation and environmental protection.

The application of RunFlat technology, safe driving of the vehicle even when the tire is completely deflated.

# ELEVE HP5

**SUV HP Tire**

**ELEVE HP5** Enhanced profile design improved handling performance in wet conditions performance to enjoy the driving pleasure with premium SUV.

## Features & Benefits

Optimized multi-pitch tread groove design and closed sipes effectively reduce noise and allow for a more comfortable ride.

Extra-Strengthen design of the blocks on both sides provides excellent driving force and steering performance.

Enhanced profile design provides excellent handling performance.

Four circumferential main groove design provides effective drainage and improved handling performance in wet conditions. Horizontal groove design makes constant good handling performance during abrasion.

## PracticalMax H/T RS21

SUV HIT

Drainage Handling Comfort Safety

**PracticalMax H/T RS21** has excellent performance of handling and silence, is specially designed for city SUV. Stability tread blocks provide super brake performance and excellent handling. It fits both county and city roads, with comfort and silence.

### Features & Benefits

4wide circumferential grooves with lugs provide effective water drainage, improve security in wet conditions.

Solid uniform tread blocks with circumferential ribs improve straight line stability.

3D steps on shoulder, provides attractive appearance and improves heat dissipation.

Crooked sipes reduce water film a lot and prevent hydroplaning.

Step grooves floor prevents pebbles.

## PracticalMax MT RS25

**SUV MT**

**PracticalMax MT RS25** is specially designed for ORV, providing super driving force, grips, anti-skidding, excellent handling. It's the best choice to challenge hills, mud, and snow.

### Features & Benefits

Double orthople casings improve strength a lot, meet the demand of the worst condition.

Hexagon bead ring with sil steel wire improves a lot ti

Protecting dam and rough design on shoulder improve impact resistance and durability.

Big pattern blocks and wider grips, provide excellent driving force, grips and anti-skidding on off roads.

# ELEVE AT5

**SUV AT**

**ELEVE AT5** Original all-terrain pattern design with excellent grip and outstanding performance improves the comfort on paved road and abrasion performance on unpaved road that allows for a comfortable ride all year.

## Features & Benefits

- Vertical varied groove design:** The vertical varied groove design strengthens visual impact, and reduces groove noise.
- Wetland sipes on shoulder:** Wetland sipes on shoulder grooves enhance wet road performance and noise deduction.
- Functional material:** Usage of functional material provides excellent cut-resistance.
- Stepped grooves design:** Stepped grooves design ensures outstanding vastly enhancing performance on muddy and rocky road, and effectively removes gravel.
- Block combinations:** Various combinations of blocks which support tread rigidity and enhance wear resistance and handling, resulting in better adaption to all-terrain use.

## PracticalMax H/T RS27

### Cross H/T

**PracticalMax H/T RS27** Radial tire for pickups, vans and SUVs. Offers great traction on Middle-East terrain. Synchronized comfort on urban off-road and poorly-paved terrain.

### Features & Benefits

4-channel zigzag grooves and lateral grooves provide excellent handling performance under wet road conditions.

Three-dimensional stepped sipes design enhances heat dissipation performance that allows to deal with the blazing hot desert environment easily.

Combination of wide zigzag grooves with multi-directional sipes, maximize performance to expel slush and mud for optimum traction.

Usage of functional material provides excellent cut-resistance and handling, resulting in better adaption to desert use.

# H2000

**All Season UHP**

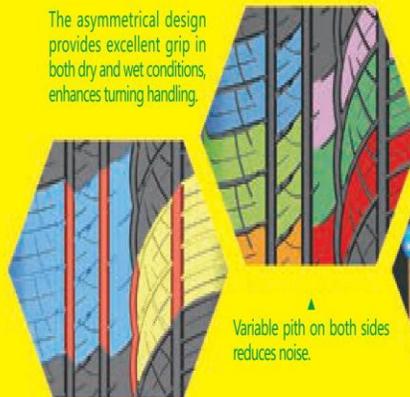

Braking Drainage Handling Fuel-saving

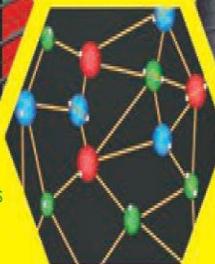

**H2000** is designed for top grade users seeking ultra-high performance. The asymmetrical, unidirectional tread design provides excellent handling and comfort. All season design delivers excellent wet grip. It delivers all outstanding performance and brings you excellent fun of driving.

## Features & Benefits

The asymmetrical design provides excellent grip in both dry and wet conditions, enhances turning handling.

The updated SSBR and silica compound provide excellent wet grip, much reduced rolling resistance, and terrific handling in high speed.

Strong circumferential central rib improves straightline stability.

Variable pitch on both sides reduces noise.

The corrugated central grooves direct water, the wide-angle grooves enhance anti-hydroplaning capabilities. It runs easily on downpour highway.

Rim protector designed.

## SnowShoes AW11

Winter

**SnowShoes AW11** is designed especially for winter road for commercial vans, which are helpful in providing safety in icy/snowy pavement Snow Drainage Braking Handling.

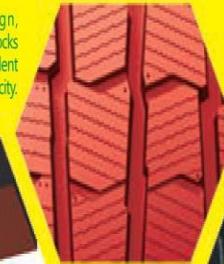

### Features & Benefits

Deepened pattern design, combining with enhanced blocks in the shoulder, provide excellent wear resistance and load capacity.

Special low-temperature tread compound, perform strong grip on snow and ice, provide excellent handling performance.

Wideblock pattern in the tread, prevent sliding in snow and ice pavement, special pattern design in the shoulder, improve acceleration and braking in winter conditions.

Designed with two detailed and ultra-thin 3D sipes, working with proper angle, helps to secure handling and driving competence in ice and snow.

# IceMax RW501

Winter

**IceMax RW501** is high performance winter tyres. The asymmetrical design and excellent grips bring safe driving in winter condition.

## Features & Benefits

Detailed 3D sipes improve grips and traction on snow road, also improve the strength of blocks, providing excellent handling.

Improved shoulder blocks and sipes absorption holes, provide excellent grips on wet, snow and ice road.

Four ribs and continuous grips getting wider from centre to shoulder, provide excellent snow removes.

Special cold resistance compound for tread provide excellent breaking and safety.

# IceMax RW505

Winter

**IceMax RW505** is high performance winter tyres. The asymmetrical design and excellent grips bring safe driving in winter condition.

## Features & Benefits

Detailed 3D sipes prevent sliding, improve breaking and handling in high speed condition.

Asymmetrical design provide excellent grips, breaking and handling.

Continuous grooves from central to shoulder, bring excellent draining and safety.

Improved shoulder blocks bring excellent stability.

## Studdable

**IceMax RW506** is high performance winter tyres. The asymmetrical design and excellent grips bring safe driving in winter condition.

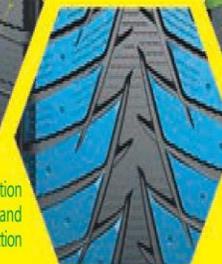

## Features & Benefits

Special stud technique brings both grips and comfortable driving.

Detailed sipes enlarge the ground contact area, draining water fast and improving grips.

Directionality studs configuration provides excellent grips and guidance, guaranteeing traction and breaking.

Directional design brings efficient drainage.
